Dickten Masch Plastics Hires Andy Bondhus as Plastics Engineer *Industry veteran adds experience and expertise to DMP's offerings*

NASHOTAH, Wis. (July 28, 2010) – Dickten Masch Plastics (DMP), a custom thermoplastics and thermoset molder based in Wisconsin and Iowa, has added industry veteran Andy Bondhus as Plastics Engineer.

Bondhus will be based out of Dickten Masch's Iowa facility. In his role, he will support part design, mold flow, tooling and tool design for DMP.

"Andy is very well respected within the industry, and we're thrilled to have him at Dickten Masch," said Steve Dyer, DMP's President and CEO. "He brings the design, tooling and project engineering capabilities that we're looking for to take care of our customers and to grow our business."

Bondhus began his career at Lake Tool, Inc. as a mold maker. Afterward, he founded his own 15-person company, Plastic Solutions, Inc., in 1995 and ran it for 11 years, during which it experienced rapid and extensive growth.

Most recently, Bondhus worked at Innovative Injection Technologies, Inc. (i2tech) as a Senior Project Engineer and a Tooling and Design Engineer. He has had training in Moldflow Software, Dukane Vibration Welding, and FEA Software.

"I came to Dickten Masch because of their reputation for having a highly experienced team" said Bondhus. "I feel this is a good opportunity for me to grow personally and also to support the growth of our company and our customers. I'm used to the pressure and challenges that come with wearing a variety of hats, so I'm looking forward to applying my leadership and management experience in a way that makes our customers even more successful."

Bondhus' experience fits well into the Dickten Masch principle of offering customers "Our Expertise. Your advantage."

"We're building our team for the future," said Dyer. "Andy's knowledge, background, experience and attentiveness to customer needs make him exactly the type of person we want on board."

About Dickten Masch Plastics: *Dickten Masch Plastics is a custom thermoplastics and thermoset molder with technical expertise and advanced processing capabilities that produce unique advantages for customers in a range of industries. The company's commitment is to help customers throughout the value stream by providing engineering and design support, world-class materials analysis, high-quality tooling, rapid prototyping, experienced project management and an array of value-added secondary operations. As part of the Patman Group of companies, Dickten Masch Plastics has access to the resources it needs to grow in a way that is most advantageous to customers.
